Themed Career Talks

Friday, 27 May 2022

10.30am

Topic: A World Below the Wing: The Buzz of Airside Activity

Airport operations encompass all the processes involved to ensure your travel experience runs as smoothly as possible, from the start of your journey from your check-in process with your luggage or cargo, till you are safely seated in the aircraft ready for your impending adventure. No role is too small in airport operations. Join us as we introduce the various professionals focused on airside operations and discover the instrumental roles they play in the safety and efficiency of an airport's very demanding ecosystem.

Speakers

Mr Chua Ching Hock, Deputy General Manager, Seletar Airport, Changi Airport Group

Mr Jimmy Ler, Country Director, Logwin Air+Ocean Singapore

Mr Chan Yee Lin, Head Ramp Services (Customer Airlines / Freighter Ops), SATS

Ms Grace Foo, Operations Director, dnata Singapore

Moderator

Mr Ling Ming Koon, Senior Vice President, Airport Operations Planning & Airside, Changi Airport Group

11.30am

Topic: Sustainable Aviation – The Future is Green (Airport Focus)

Climate change is a generational and existential threat. Our global economy is tightly intertwined with aviation as it facilitates commerce and connects people to the world. As air travel continues to rise, there is a global focus on understanding the environmental impacts of aviation. Sustainability will be a key priority for Singapore's aviation sector in the coming years as it revives air travel and rebuilds the Singapore air hub. Join us at the talks to better understand what airport and airline stakeholders are doing individually and collectively to achieve a sustainable air hub.

Speakers

Ms Tan Yen Ling, Head (Sustainability), SATS

Mr Wong Yue Jeen, Senior Vice President (Partnership Management & Business Development), SIA Engineering Company

Mr Gerald Ng, Vice President, Environment and Sustainability, Regulatory & Economic Affairs, Changi Airport Group

Moderator

Mr Daniel Ng, Chief Sustainability Officer & Director (Air Transport), Civil Aviation Authority of Singapore

2.00pm

Topic: World-Class and Inspiring: Aviation Service Excellence

With millions of passenger movements passing through Changi Airport every year pre-COVID, it is essential for every partner in the airport value chain to be grounded by our code of service excellence, to create a seamless and enjoyable experience for every traveller. Sit in for our candid chat with

key service professionals as they share their breadth of service experience, training requirements and challenges faced with their continuous pursuit in upholding Singapore and Changi Airport's renowned reputation for service excellence.

Speakers

Ms Sharifah Azzah, Senior Manager (Quality and Premium Services), SATS

Ms Chanel Wong, Senior Associate, Airport Operations Management, Changi Airport Group

Ms Chen You Huai, Flight Stewardess, Singapore Airlines

Mr Mohamed Salih Mohamed Relvanullah, Operations Manager, JetQuay

Moderator

Ms Lee Ching Wern, General Manager, Airport Operations Management, Changi Airport Group

4.30pm

Topic: Aviation at the Frontier of Technology

Aviation is one of the most global and impactful industries enabling global economic prosperity. Now, add technology into the equation – immediately the possibilities, both in terms of impact and careers, are stretched even further. Welcome to the world of Aviation Technology (AvTech), where an exciting and dynamic career awaits those who are passionate about aviation and technology. Curious about how artificial intelligence, unmanned technology, data science, and Internet of Things are paving the way for an electrifying aviation future? Grab a front row seat and find out how aviation's giants are leveraging technology to push frontiers.

Topic: The Aviation Engineer: Powering our Future

An engineer is involved in designing and testing products for various parts of an aircraft such as its airframe, engines and other related aircraft equipment. Engineers are also needed

for airspace development, airport design and aircraft navigation technologies. You will discover that being an engineer in the aviation sector is more than just aircraft maintenance and repair, it means you can also be heavily involved in improving aviation technologies to support the advancement of commercial aviation, or in aerospace companies specialising in the technological advancement of aircraft parts and equipment. Come and find out more about this diverse field.

Speakers

Mr Hon Lung Chu, Head of Singapore and Business Development SEA, Volocopter

Ms Liu Yanling, Vice President, Airfield Operations, Airside Transformation and Operations Strategy, Changi Airport Group

Mr Casey Chang, Vice President, Data & Analytics, Singapore Airlines

Mr Raymond Tay, Head of Software Engineering, Aviation Innovation Research Lab

Moderator

Mr Tan Kah Han, Chief Technology Officer & Senior Director (Unmanned Systems Group), Civil Aviation Authority of Singapore
