

Taking Singapore Aviation to Greater Heights

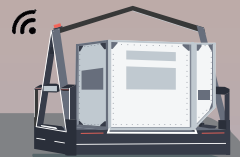

A Building a Safe and Sustainable Air Hub

- Strengthening our aviation safety regime, culture, and leadership to support ramp up and future growth
- Driving decarbonisation efforts for more sustainable air travel

B Transforming Airport Operations

- Enhancing the passenger experience through technology and digital solutions
- Augmenting manpower and enhancing efficiency of airport operations through automation

C Innovating at the Forefront of Aviation

- Driving a new concept of operations for Air Traffic Management to make air travel more efficient
- Building capability and establishing thought leadership within the unmanned systems industry to capture opportunities
- Developing local capabilities in critical aviation infrastructure and systems

D Developing a Future-ready and Resilient Workforce

- Creating quality jobs for Singaporeans
- Improving worker productivity and alleviating physical stress
- Building a cohesive OneAviation community
