B-roll captions

SATS Coolport in Singapore has 18 cold rooms and four main temperature zones ranging from -28°C to 25°C.

SATS is increasing charging points for active temperature-controlled containers in anticipation of temporary storage needs.

Inbound pharmaceutical products that require storage will occupy one of SATS Coolport's cold rooms or 200 pallet positions in its multi-level material handling system.

SATS Coolport has a handling capacity of up to 300,000 tonnes of perishable cargo annually.

Elevating transfer vehicles will transport, store, and retrieve temperature-controlled containers from SATS' multi-level material handling system.

SATS Coolport has a handling capacity of up to 300,000 tonnes of perishable cargo annually.

SATS Coolport has invested in enhancing its IATA CEIV Pharma certified facility in anticipation of vaccine handling needs.

SATS Coolport staff conducts 24/7 temperature checks to ensure the temperature integrity of pharmaceutical products.
