

4 August 2016, Singapore Aviation Academy

With many lives and businesses depending on air transportation today, safety in the aviation industry remains of paramount importance. To ensure that Singapore adheres to international safety standards and best practices, the Civil Aviation Authority of Singapore (CAAS) continues to drive the highest standards of safety.

In this seminar, CAAS and our industry partners will provide an update on the significant changes to dangerous goods regulations with a focus on the carriage of lithium batteries. You will gain an awareness of the inherent risk of lithium batteries and an understanding of the requirements associated with the safe carriage of lithium batteries by air.

Jointly brought to you by CAAS, Scoot Pte Ltd, SATS Airport Services Pte Ltd and SAAA@Singapore, details of the seminar are as provided below.

We look forward to your active participation at the CAAS Safety Series seminar.

## Programme Highlights

### About the CAAS Safety Series

CAAS seeks to promote a strong safety culture and embed a robust safety framework through greater collaboration and engagement with the aviation community. CAAS therefore launched the CAAS Safety Series since 2011 as a platform for updating the aviation industry on developments in safety policies and regulations as well as addresses any impact of new programmes/changes on the industry. Comprising a mix of monthly talks, workshops or seminars on topical issues related to aviation safety, the CAAS Safety Series seeks to encourage sharing of views and feedback from the industry.

Please visit [www.caas.gov.sg](http://www.caas.gov.sg) for the calendar of events.
