

CELEBRATING THE CHAPTERS OF SINGAPORE AVIATION

“Our Journey, Our Future”, the Singapore Aviation Centennial Exhibition, which is presented in the concept of an aviation journal, traces the historical journey of Singapore aviation, highlighting the milestones that have shaped the industry today. It also provides a deeper understanding of how aviation has contributed to Singapore’s economy, brought the world closer to the country, and opened up business and leisure opportunities. While showcasing the multi-faceted aspects of Singapore’s aviation industry, it will also provide a glimpse of the future of aviation through the eyes of our aviation partners.

The Singapore aviation journey begins with *“Flying Through a New Era”*, where visitors are transported back to a century of big and small steps in Singapore aviation and how a liberal aviation policy helped create remarkable connectivity with cities around the world. Learn more about the milestones of Singapore’s aviation journey by flipping through the interactive iPads and hear accounts of personal experiences and anecdotes from aviation professionals about the exciting world of aviation.
